

COPPER FOIL SIGNAL CAPACITORS

Our own production audio signal capacitor range is now complete with the addition of the 0.39uf/630 volt capacitor. This is without question the best and most competitive range of audio signal capacitors available by some considerable margin.

The new copper and silver foil signal capacitors are available in a range that is specifically targeted at the single-ended triode amplifier market, although most values will also be excellent for other types of audio application.

Apart from the considerable improvement in price, the fact that the new copper foil capacitors are considerably better sounding than anything else - including the previous Jensen-made copper signal caps - makes them even better sonic value. The improvement is due to the use of greatly improved materials, better production methods and tighter production tolerances, plus the fact that the new caps are encased in copper instead of aluminium, glass or plastic.

Value	Length	Diameter
0.001 - 0.015uF	30mm	15mm
0.022 - 0.068uF	40mm	15mm
0.1 - 0.12uF	40mm	20mm
0.15 - 0.39uF	50mm	20mm
0.47 - 1.0uF	53mm	35mm
2.2uF	67mm	35mm
3.3uF	94mm	35mm
4.7 - 10uF	95mm	54mm
