

The outstanding features of Audyn cap Plus are exceeded by Audyn cap reference. More details and more dimensionality in music. Very long term stability, mechanically stabilized, vibration free shed, induction free, selfhealing construction, contact surface on both ends specially treated with sulphate granulation special copper plate connection at both ends guarantee perfect connection. This leads to better connection compared to usual connection with simple solder. Better and bigger surface with Tritec wires leads, stable housing, low loss factor, an absolute top quality high end component.
