Quantum Purifiers

Large Gold Quantum Purifiers are typically used in AC applications (especially recommended for solid-state electronics), and with loudspeaker transducers, especially electrostatic and metal-driver designs.

Specially shielded using ERS Stealth carbon fiber material.

Length: 2 inches

Diameter: 1/2 inch

Leads: one inch, 14 gauge 14K gold

Current-handling: 15 A

Voltage: >1000 V

Resistance: 0.025 ohm
