

White Lightning RCA Interconnect

The White Lightning interconnect is a high-value interconnect featuring OFC pure copper conductors and a foam PE dielectric. Combined with low capacitance at 24pF/foot and a heavy braided shield, White Lightning provides a very natural tonal balance with abundant detail and warmth and a remarkably open soundstage.

Each cable is hand-terminated with high quality DH Labs connectors and lead-free silver solder.

White Lightning is RoHS compliant, very flexible and easy to use.

The new DH Labs White Lightning has lower Capacitance, improved shielding, and a more attractive appearance make the WHITE LIGHTNING an even better value than its predecessor. The cable is also RoHS compliant, very flexible and easy to use.

The White Lightning provides a very natural tonal balance, with abundant detail and warmth. Each cable is hand terminated with high quality DH Labs connectors and lead-free silver solder.

Don't be fooled by the affordable price! The DH Labs White Lightning Interconnect offers a remarkably open soundstage that reminds you how much fun music can be! It is at home in any high quality audio or home theater system.
