

SILVER SONIC™

The foundation of sound reproduction is based upon using the finest materials in a way to capture their best performance. The secret of DH Labs 20 year success story is a deeper passion and understanding of how a perfect cable should perform (minus all of the promotional gimmicks).

“The Revelation interconnects and Q-10 speaker cables excel at delineation and dynamics. Three dollar signs for value; put them on your audition list.”

- John Marks, Stereophile

Six Pure Silver conductors in an interleaved helical array. Each conductor is individually insulated in an air-spaced, tape wrapped version of our exclusive Air Matrix dielectric. The result is a revelation offering “stunning dynamics”, and more involvement with your music.

The cable is covered with an attractive woven fiber jacket and meticulously hand terminated with our finest connectors. Many worthy manufacturers would classify such a combination of materials and construction as a “COST-NO-OBJECT statement product”.
