

FURUTECH

PURE TRANSMISSION

High Performance IEC connector

FI-C15(G)

FI-C15(G) IEC connector

Type: 2-pole+earth, Rating: 15A 125V / 10A 250V A.C.

Furutech is known the world over for a huge variety of top-quality OEM parts and delivers consistently superior results by following Pure Transmission principles; examine every link in the power and signal path and ultimately optimize each and every element.

The new FI-C15 series feature a new plating technique which delivers sonic improvements and a more durable finish. Also, new to the series are new design cable clamps for firm grip and resonance control. New slim design for use with amplifiers or components with space restricted IEC sockets.

Features

- 24k gold-plated α (Alpha) Pure copper Conductor
- Nylon /fiberglass main body and inner cover plate.
- Specified for cable diameters of 6.6mm to 16.0mm (Wire size of 3.5mm² (12AWG) max.)
- Polycarbonate cable damping clamp with stainless screws
- Connection: Set screw
- Dimensions: 22.0mm X 30.0mm X 82.2mm overall length.

Specially Engineered Pressure Plate and Wire Clamp

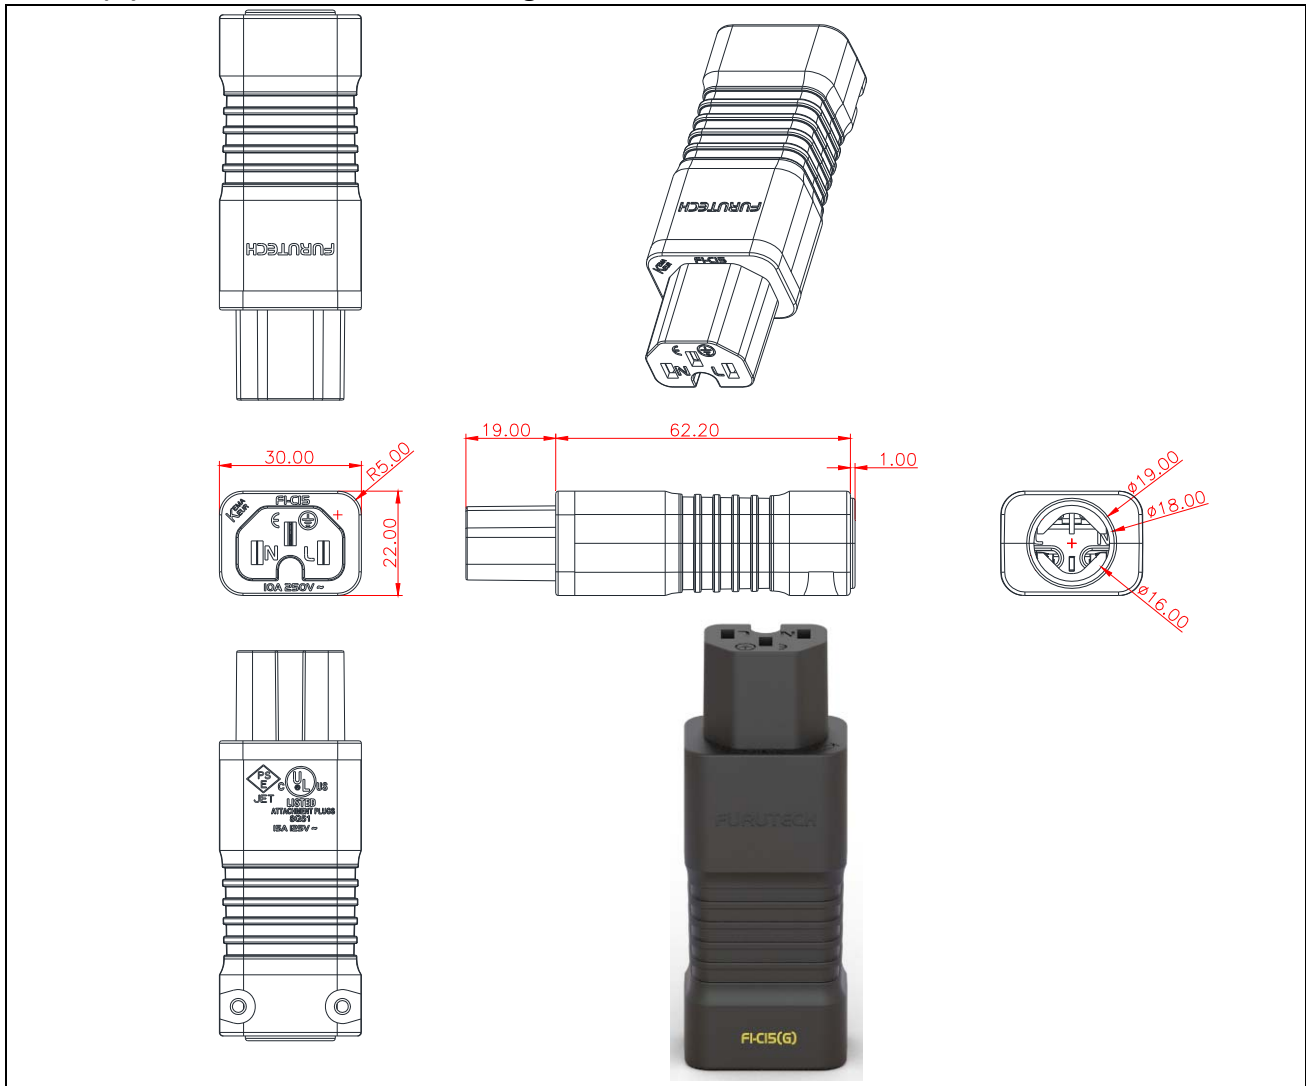

Regular Clamp

Furutech Patent Pending Clamp

Contact Area Calculated Increase: 17.142%
