

Jupiter Silver in Cotton or Silk Sleaving

Jupiter offers a wide range of wires, including their sensational 4N silver wire. It's incredibly popular for low-level signal hookup wiring, interconnect (x3 run) and speaker cables (x 8 run). These Jupiter wires are all high purity metals with natural cotton insulation. Cotton insulation acts as a fibrous matrix for separating wires while maintaining a predominantly air dielectric, sonically very natural and open. So many of the modern innovations do not translate to better or more natural sound.

Jupiter AWG 28	0.32mm diameter, overall diameter 0.8mm, single 4N silver core, cotton insulated wire
Jupiter AWG 28	0.32mm diameter, overall diameter 0.8mm, single 5N silver core, silk insulated wire
Jupiter AWG 23	0.573mm diameter, overall diameter 0.9mm, single 4N silver core, cotton insulated wire.
Jupiter AWG 22	0.65mm diameter, overall diameter 0.95mm, single 5N silver core, cotton insulated wire.
Jupiter AWG 20	0.81mm diameter, overall diameter 1.60mm, single 45 silver core, cotton insulated wire.
