

WIREWORLD®

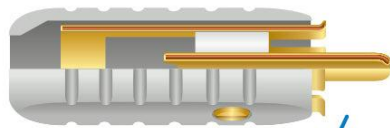

CABLE TECHNOLOGY

Ideal for smaller systems and custom installations, Solstice 8 subwoofer wire provides great durability and ease of use, along with superb sound quality. Upgraded Tri DNA HELIX design reduces eddy current losses for greater resolution and dynamic contrast. COMPOSILEX 3 insulation improve reproduction of musical detail and expression. Gold Tube RCA plugs have a smooth firm grip and the highest conductivity in their class.

The better the links in the audio chain, the more musical detail and expression we hear. Wireworld single channel subwoofer audio cables are designed, tested and manufactured to provide the deepest, most vibrant and physically satisfying bass from your home theater and music system. Our subwoofer connector cables feature a patented DNA HELIX® design that uses parallel strands in layered flat conductors to channel electromagnetic signal energy more efficiently than other designs, for the most impactful and richly textured bass your sub can produce.

Solstice® 8 Audio Interconnect Cable

Innovative designs connecting passion with technology

Gold-Tube™ plug with silver+gold plating for great connections

23ga. Silver-plated OFC* conductors increase definition

Composilex® 3 insulation technology controls electrostatic energy

Patented** DNA Helix® design delivers dynamic sound quality

*Oxygen-Free Copper **U.S. Patent #8,569,627
