

WIREWORLD®

CABLE TECHNOLOGY

PULSE MINI JACK CABLE: With Oxygen-Free Copper conductors in Wireworld's unique DNA Helix cable design, Pulse Nano cable provides superior imaging and expressive dynamics, while the Composilex 2 insulation improves focus and clarity. An amazing, cost-effective upgrade for your portable devices.

You've got the equipment, and now you're looking for answers on how to make it truly sing. Take the purity of your music to the next level and draw the detail from your source like never before. Superior DNA Helix designs with unique Composilex 2 insulation deliver a greater range of dynamic contrasts and musical expression than ever before. Enjoy reduced listening fatigue along with improved definition and image focus with this simple upgrade. Patented Silver-Tube™ RCA connectors feature the highest conductivity available, and their unique silicone rubber tension band provides a perfect grip on any jack.

Pulse™ Audio Interconnect Cable

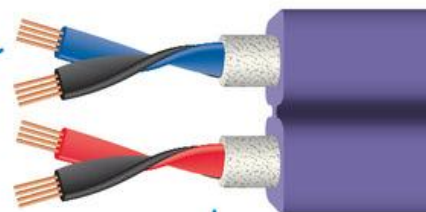

Innovative designs connecting passion with technology

24K gold-plated contacts ensure reliable connections

27ga. OFC* conductors for rewarding improvements in clarity

Composilex® 2 insulation technology controls electrostatic energy

Patented** DNA Helix® design delivers dynamic sound quality

*Oxygen-Free Copper **U.S. Patent #8,569,627
