## CABLE TECHNOLOGY

**OASIS 8 INTERCONNECT:** Oasis 8's new Tri DNA Helix design advances the art of musical preservation in both interconnect and microphone applications. This extremely flexible and quiet 21 AWG cable reveals musical details and dynamics far beyond the capabilities of previous cables in its price range.

### Oasis® 8 Audio Interconnect Cable

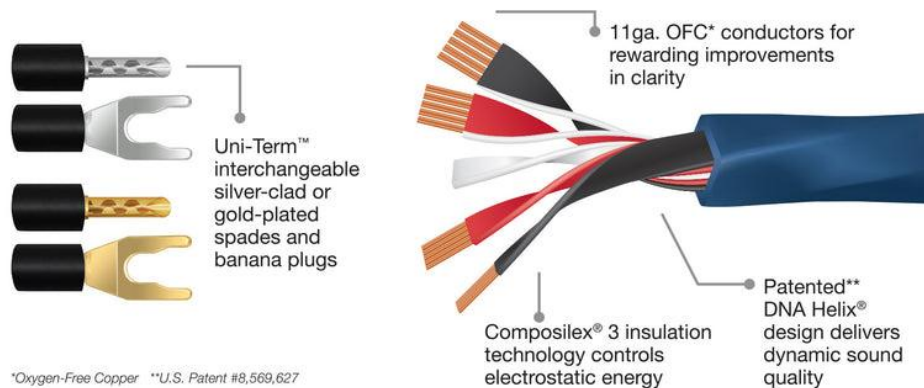

*Innovative designs connecting passion with technology*

**OASIS 8 SPEAKER CABLE:** With 60% more Oxygen-Free Copper than Solstice, Oasis 8 makes dramatic improvements in image focus and dynamic expression, exceeding the performance of other popularly priced speaker cables. Series 8 speaker cables have more strand groups than Series 7, which strengthens the electromagnetic field that moves the signal through the cable. Along with the addition of COMPOSILEX® 3, these upgrades improve clarity, dynamics, soundstaging and image focus.

### Oasis® 8 Speaker Cable
